First released: 1985

Protection: None

Notes

A utility to strip the text from Ceefax pages 231, 236 and 238 and to transfer this into View. Ceefax pages may also be saved and used off-line.

The program needs a Teletext adapter attached as it uses *commands which are in the TFS ROM. View must be in the computer too. As Ceefax is no longer published the title is saved merely as a curiosity to show what could be done.
